Infectious waste

Yes please:

Objects contaminated with body fluids from patients with diseases caused by infectious matter associated with risk class 3, according to AFS 2018:4

Waste must be well-saturated or heavily blood stained.

Blood tubes.

Cultivation media with infectious matter in risk class 2

Waste containing GMM from operational activity level F and L

No thank you:

Cutting/piercing waste

Cultivation media with infectious matter in risk class 3 and any objects or substances containing suspected or confirmed infectious matter in risk class 4.

NOTE: There is a separate routine for these substances

Handling:

Pack the waste in a yellow waste box. Fit the lid properly. Sealed waste boxes are not allowed to weigh more than 10 kg. Sealed waste boxes to be stored for longer than one day, but less than seven days, must be stored at a maximum of +8 °C. The area must be locked and marked. Use absorption cloth in the box if the waste is liquid.

Attach the label "Infectious waste".

Material: Waste box, absorption cloth and labels are ordered from MediCarrier.

Huddinge: Send the waste box by way of the supply station (Försörjningsstation) to the in-house environmental recycling station (Miljöstation) S32.

Solna: Order pickup by the icon *transportbeställning* on the first page on Inuti. Or, call Servicecenter, tel. (585) 81 000.

New hospital building in Solna: Sealed waste boxes should be left on the AGV cart in the recycling room.
