

# National initiatives to facilitate clinical implementation of ATMPs

Competence centre for process and product development and manufacturing of ATMPs

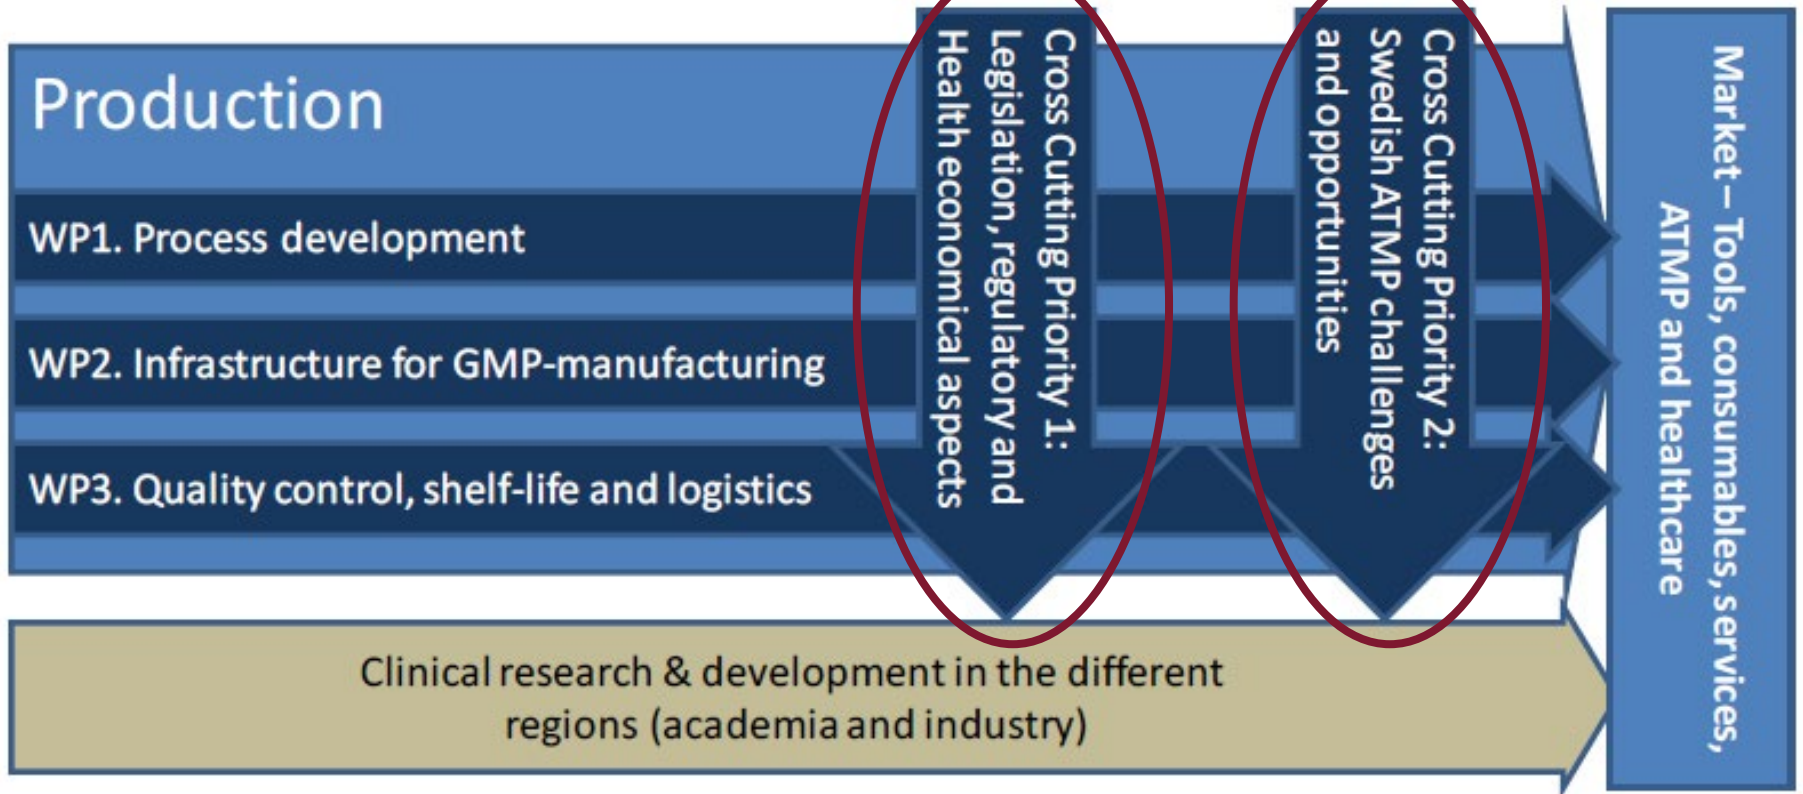

Strategic project for ATMPs, focusing on legislation, ethics, knowledge exchange and communication

**CAMP**  
Guiding ATMPs to patients

**SWELife**

# SWELife

## ATMP

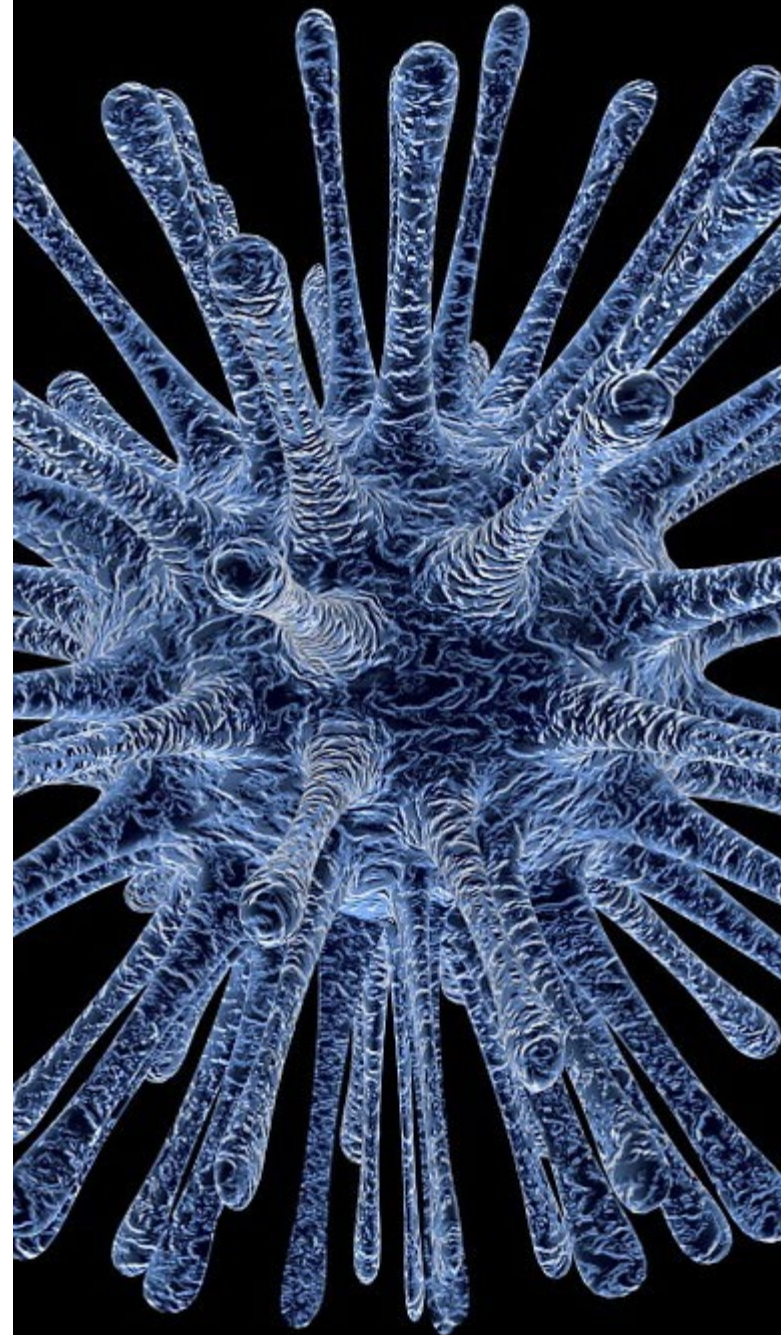

Increased competitiveness within cell and gene therapy

### Aim

- > Strengthen Sweden's competitiveness within advanced therapies (ATMP)

### Objectives

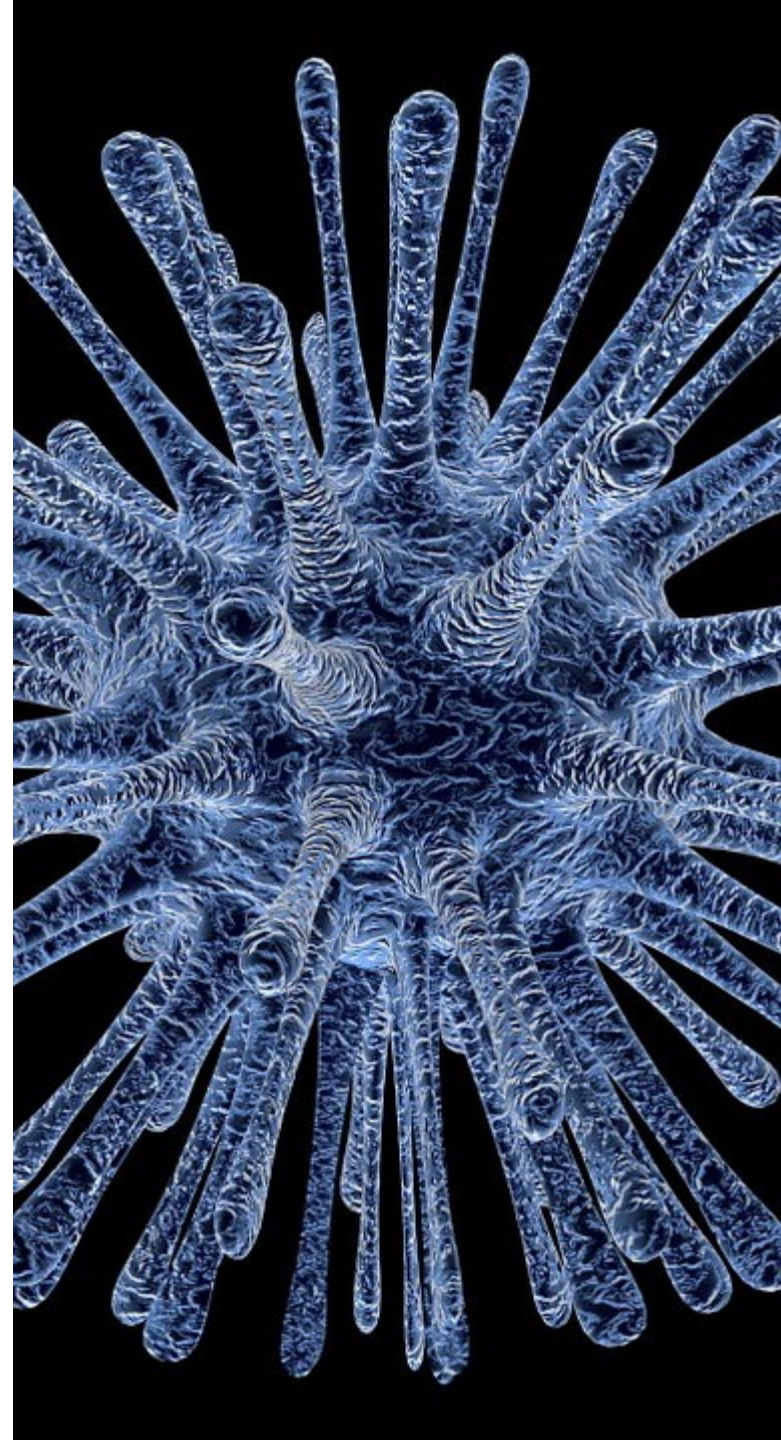

- > Increased national knowledge about and competence for development of ATMPs
- > Increased visibility and awareness of ATMPs in society and healthcare
- > Speed up clinical translation (without loss of quality or safety)

> Increased national knowledge about and competence for development of ATMPs

## How?

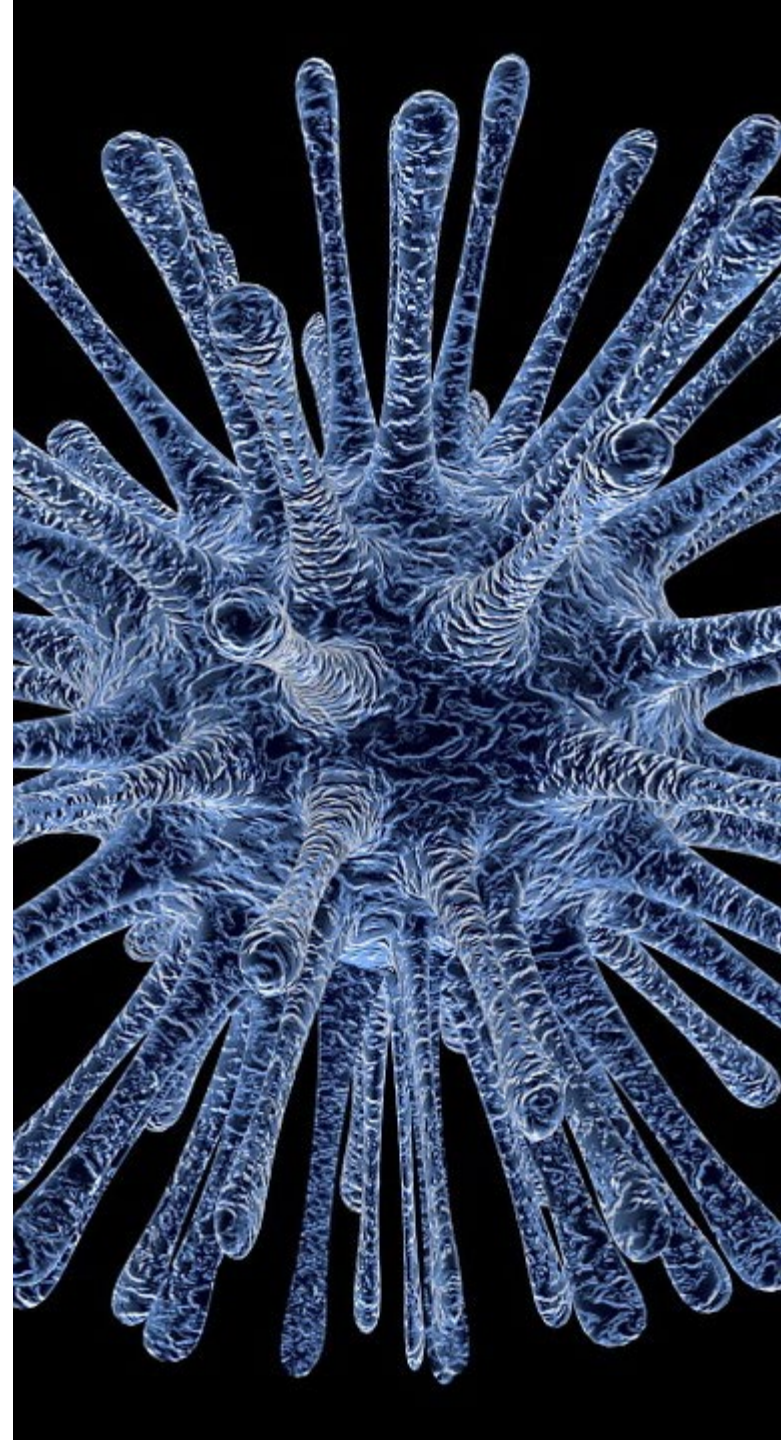

- National conference (April 4 2019)
- Educational seminars together with Vävnadsrådets VOG Cell (GMP for ATMP, May 2019)
- System development projects addressing regulatory, ethical and strategic issues (Regulatory guide available on [Karolinska.se/kcc](http://Karolinska.se/kcc))
- Work shops gathering big pharma, SMEs, academia and healthcare in common dialogue

> Increased visibility and awareness of ATMPs in society and healthcare

## How?

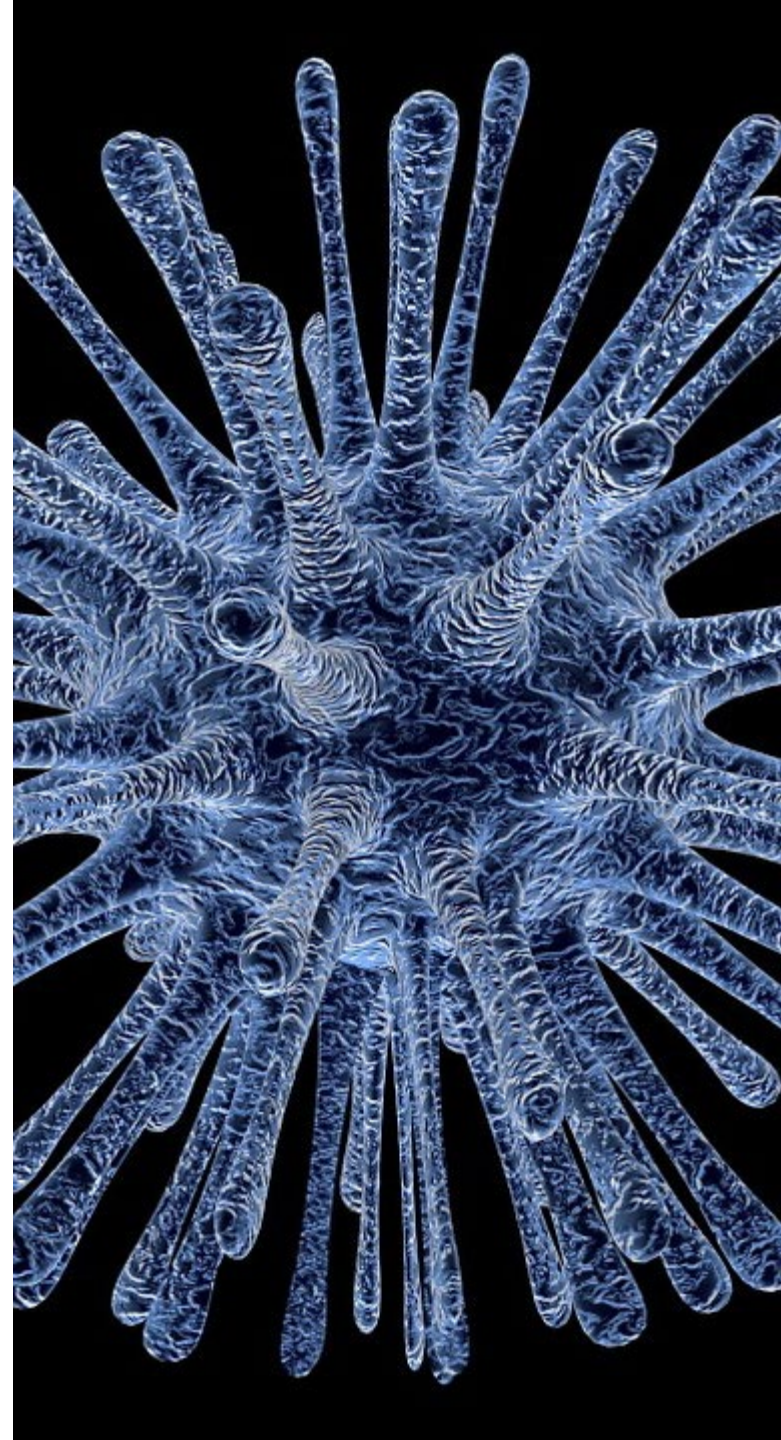

- Web page (under construction)
- LinkedIn (Centre for Advanced Medical Products)
- Patient organisations and participation in “public dialogue”

> Speed up clinical translation  
(without loss of quality or safety)

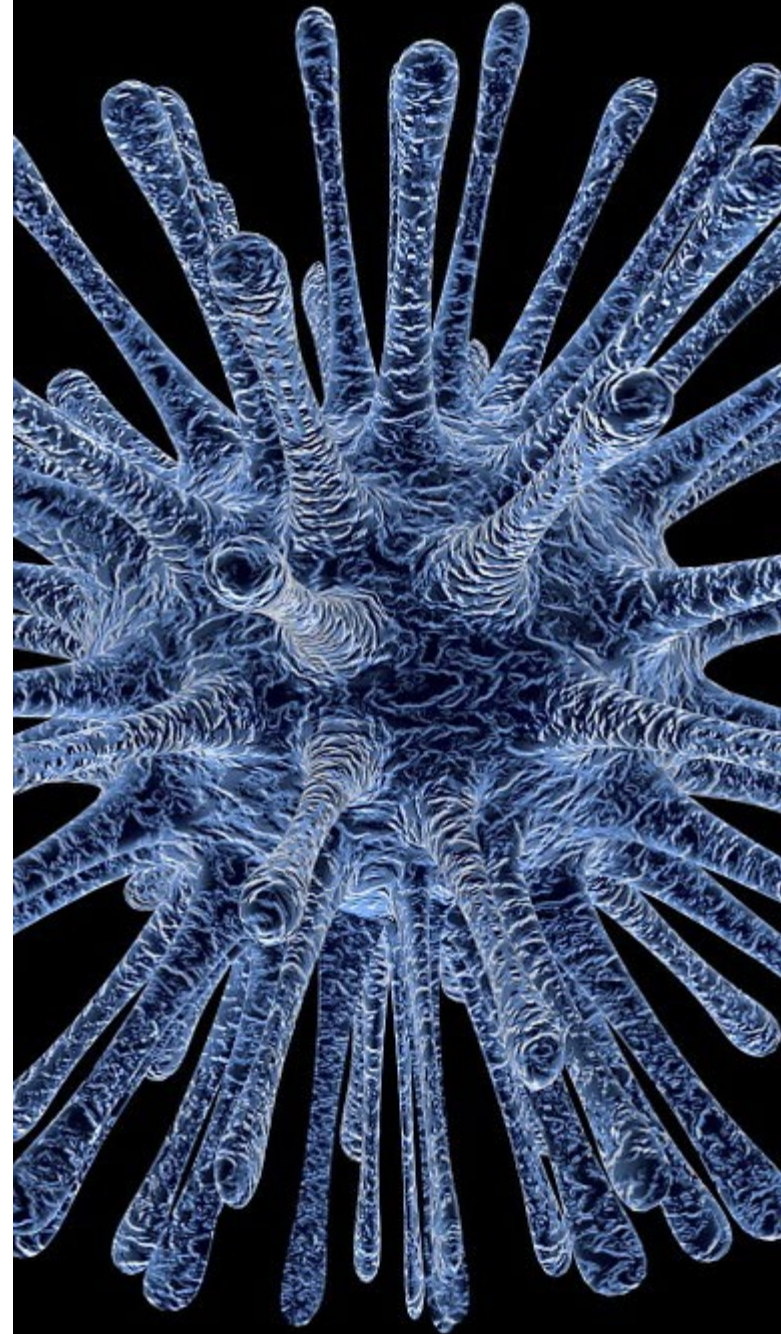

## How?

- Compiled knowledge (Regulatory guide, support networks, web, seminars etc)
- Providing support for development of quality assured ATMPs for clinical trial
- Sharing knowledge between sites

## Work packages:

1. Project management
2. National conference
3. Communication
4. System development projects
  - SDP1 – regulatory
  - SDP2 – stem cell based medicines
  - SDP3 – business models and health economy
  - SDP4 – gene therapy

# Thank you!
