Adress:

Clinical Skills- and Simulation Center

Alfred Nobel allé 8 plan 5

Karolinska University Hospital, Huddinge

141 86 Stockholm

Clinical Skills and Simulation Center

Karolinska University Hospital
Huddinge

A comprehensive center for high practice and patient safety

Clinical Skills and Simulation Center is designed

for practical training and offers training on simulators, mannequins and medical equipment to reduce risks for patient injuries.

Students from health sciences education programs, universities and personnel at the Karolinska University Hospital practice, master and maintain clinical skills.

The Clinical Skills Center is networking with other national skills centers, universities and companies that manufacture safety products which are used at the Karolinska University Hospital.

Examples of element training on mannequins

Peripheral Venous Catheter	Interprofessional learning
Proctoscopy, Rectoscopy	Breast, prostate palpation
Suction and oxygen equipment	Lumbar- and epidural puncture
CPR education	Tracheotomy and cricotomy
Suprapubic catheterisation	Suture techniques
Bandaging techniques	Blood samples
Prophylaxis and wound care	Venous specimens
Bedside caring	Central Venous Catheter
ECG techniques	Blood transfusion
How to use the first aid kit	Patient simulator - Nursing Anne
Handling emergency box	Enteral feeding
Urethral Catheterization	Intraosseous route
Knee joint puncture	Calculation and medication procedure
Intubation	Knowledge of hygiene procedure

Educational - Ethical - Safe and Secure

Gain, retain and maintain the competence

Instructors, supervisors and teachers ensure that the training is carried out in a structured and safe way according to clinical guidelines.

After receiving theoretical and practical background the students are welcome to practice their skills on their own.
